**Biography:**

Dr. Danielle Bronk is the owner of Neurodevelopmental Health Services, a private neuropsychology practice established in 2014 offering evaluation services across the lifespan in Upstate New York. She evaluates the cognitive capacities of individuals with suspected neurodevelopmental disorders or other neurologically-based conditions, and provides treatment and educational recommendations. She has consulted to various agencies and served as the Director of Clinical Services for a non-profit agency serving individuals with an autism spectrum disorder prior to opening her practice. Dr. Bronk received her doctorate in counseling psychology with a specialization in clinical neuropsychology from Seton Hall University in 2006 after completing a clinical neuropsychology internship at the NYU Langone Rusk Institute for Rehabilitation Medicine. She then served as a postdoctoral fellow in pediatric neuropsychology at the North Shore-LIJ Health System. Dr. Bronk’s clinical interests include neurodevelopmental disorders across the lifespan, including dyslexia and autism spectrum disorder.
